## Combining Human Stem Cell Culture Supernatant and High-Permeability Essence in a Golden Ratio! Stem Cell Care in One Step Brings Anti-Aging to the Next Level

“ruNe Tech Quick AGT PA01 Extra Essence Serum” is an innovative beauty serum containing 100% pure human stem cell culture supernatant. This delicate supernatant is combined with a high-permeability essence in a unique golden ratio to deeply penetrate the skin. Now you can experience authentic stem cell care in just one step. The 500 types of rich skincare ingredients in the human stem cell culture supernatant, such as growth factors and cytokines, work directly on skin cells to address various skin concerns from the root.

## Normalizing Turnover to Revitalize Aging Skin into Ultimate Timeless Beauty!

This product directly approaches weakened stem cells, dramatically enhancing “self-renewal” and “multipotency.” It regenerates aging skin at the cellular level. At the same time, the production of new skin cells helps normalize the slowed turnover caused by aging, promoting the production of collagen and elastin in the dermis. This revitalization restores firmness and elasticity, resolves skin aging issues, and removes excess melanin to guide your skin to a healthy, youthful appearance.

### High Penetration Essence

Harness the beauty-enhancing power of human stem cell culture solution! Supports skin condition with cleansing and antibacterial effects.

#### Skin Hydration Effect

With a surface tension of 62 mN/m (at 25°C), “High Penetration Essence” reduces water tension, making it easy to blend into the skin. High penetration provides moisture to the deeper layers of the skin.

#### Skin Cleansing Effect

By reducing the gas dissolved in water, it effectively cleanses impurities and dirt from the skin. Prevents oxidation and aging odor.

#### Corrosion-Free

Contains no alkaline agents or corrosive substances. Maintains stability over time while protecting the skin.

#### Safety

With mild acidity (pH11), it decomposes irritating substances to make them skin-friendly, providing peace of mind in use.

#### Drug Delivery System

Enhances safety by penetrating deeply and delivering ingredients effectively. Helps with quick recovery for damaged skin and other areas.

### Human Stem Cell Culture Solution

Packed with over 500 growth factors and beauty components! Activates cells and accelerates repair, renewal, and regeneration of skin.

#### VEGF | Enhances Metabolism

Activates nutrient absorption. Promotes the formation of blood vessels around hair follicles.

#### HGF | Tissue Repair

Strengthens cell proliferation and supports tissue and vascular regeneration.

#### FGF-1 | Wound Healing

Promotes the formation of new blood vessels. Assists in skin regeneration and supports healing of wounds.

#### FGF-2 | Blood Vessel Formation

Strengthens blood flow and vascular functions. Promotes growth in tissues and blood vessels.

#### EGF | Epidermis Creation

Encourages the creation of new epidermis cells and prevents wrinkles, helping the skin stay young.

#### KGF | Cell Proliferation

Promotes regeneration and the proliferation of keratinocytes and other cells.

#### IGF-2F | Strengthens Skin Tissue

Boosts collagen, elastin, and hyaluronic acid production to increase skin strength.

#### TGF- α | Skin Growth Promotion

Supports the strengthening of collagen and elastin structures. Enhances skin firmness.

#### TGF- β | Prevents Aging

Prevents aging by activating cells and improving skin texture and elasticity.
